Los Angeles 91789 | (516) 226-6666 | yang_wang@myyahoo.com

EDUCATION

Carnegie Mellon University – Pittsburgh, PA | Graduating August 2027

MS in AI System Management

University of California, Riverside – Riverside, CA | Graduated June 2026

BS in Computer Science

TECHNICAL SKILLS

Languages: Python, C++, Rust, JavaScript, SQL, HTML, CSS, Typescript

Frameworks & Tools: Node.js, YOLO, EasyOCR, Vue.js, Git, MATLAB, MS Office, Excel

RELEVANT COURSEWORK

Computer Science: A.I, Machine Learning, Data Science Ethics, Combinatorial Optimization Algorithms, Computer Graphics, Operating Systems, Compilers, Advanced Robotics, Automata and Formal Languages, Software Construction.

Work Experience

IvyElite | Front-End & AI Intern | Jun 2025 – Sep 2025

- Refactored Vue.js components and optimized CSS/HTML structure, increasing click-through rate by 5%.
- Built an AI-powered web crawler that automated data collection from social platforms, reducing manual effort by 60%.
- Designed and implemented SQL-backed features that improved site usability and reduced query response times by 25%.

Utah Open Lands | Front-End Developer | Dec 2025 – Feb 2026

- Redesigned the company website to enhance user engagement and increase click-through rates.
- Developed SEO strategies to improve website visibility and attract more traffic.
- Created landing pages for new projects while optimizing existing pages for better performance.

Sociafly | CEO and Software Engineer| Feb 2026 – Present

- Founded Sociafly as a California LLC, managing entity formation, regulatory compliance, and cross-functional product development from initial concept to full App Store deployment.
- Architected and developed a React Native mobile application for concert discovery and social coordination, integrating Firebase, real-time group chat, and E2EE messaging for production iOS releases.
- Engineered and deployed a Node.js API proxy on Railway, implementing Firebase App Check, Cloudflare rate limiting, and a Postgres and Redis event catalog to securely retain third-party keys server-side and optimize operational costs.

PROJECTS

A.I. Parking Detection System For UNIS (Python, YOLO, EasyOCR)| Jan 2026

- Created a database of license plates and annotated the dataset to train the YOLO model on.
- Developed a script to run YOLO with EasyOCR to detect and record license plates.
- Implemented a SQL database to store authorized license plates and relay it with my A.I system.

Charity: Water Landing Page (HTML, CSS)| Oct 2025

- Designed a branded landing page for non-profit charity: water, incorporating target audience insights, visual storytelling, and persuasive copy to drive awareness and donations to a global cause.
- Developed a fully branded landing page for a non-profit using AI coding assistance, HTML, and CSS.
- Used SEO tools like Semrush to optimize search rate.

Intel Sustainability Dashboard (Excel, Python)| Oct 2025

- Analyzed sustainability datasets using Excel and Python to identify high-ROI initiatives.
- Created visual dashboards and statistical models to support environmental strategy insights.
